

SME-BTTX BLUETOOTH BODYWORN AUDIO TRANSMITTER

This new product manufactured by Saul Mineroff Electronics, Inc. is an extremely small body worn device that enables the agent to transmit highly intelligible audio to a cellphone (as far as 40' away) which acts as a repeater to another phone from any other location.

For example: The agent can wear the SME-BTTX transmitter on their body, pair it up with any bluetooth capable cellphone up to 40' away and another agent can dial into the cellphone across the street or from anywhere within the entire cellular network. **Transmission is based on the cellular network.** The unit can also be placed in a room or vehicle for monitoring as well.
